

GASKETS

Gasket is sealing material placed between connection flanges.

Feature	: Create a static seal Maintain leakage proof sealing in all operation condition
Selection Criteria	: Temperature : Pressure Corrosion resistance Type of fluid

Gasket Type

- Non-Metal
- Metal
- Composite

- Non-Metal

Used in low pressure class flanged such as 150 or 300 class.

Material: CNAF, PTFE

CNAF

PTFE

- Metal

Also known as ring gasket or RTJ

Material: Soft iron, Low Carbon Steel, Stainless Steel, Monel, Inconel

- Composite

Spiral Wound, Metal Jacket

It is use wide range of pressure and temperature
