

Pressure Relief Valve

The pressure relief valve (PRV) is a type of valve used to control or limit the pressure in a system or vessel which can build up for a process upset, instrument or equipment failure, or fire. The pressure is relieved by allowing the pressurized fluid to flow from an auxiliary passage out of the system.

Material: ASTM 304/304LSS, ASTM 316/316LSS, HASTELLOY, MONEL, NCONEL,
TANTALUM, CS105, CS106 other materials on request.

Size: 1/4" To 1"
